### Reader Recipes

We're looking for unusual, innovative, or just plain good-tasting recipes. If you have a favorite you'd like to share, send to: Reader Recipes, P.O. Box 1029, Lakeville, Minn. 55044 or E-mail: Recipes@farmshow.com

#### Laura Bush's **Hot Chocolate**

6 Tbsp unsweetened cocoa 6 Tbsp sugar Pinch of salt 2 1/2 cups milk 2 1/2 cups light cream 1/2 tsp vanilla Pinch of cinnamon powder (optional) Whipped cream

Orange zest

Directions: Mix cocoa, salt, and sugar. Add milk. Heat to dissolve. Add light cream, cinnamon, vanilla. Heat to just under boiling. Mix very well and pour into warm mug. Top with whipped cream, cocoa powder and fine orange zest. Laura Bush Washington, D.C.

#### **Sweet And** Sour Cabbage

1 medium head red cabbage 1 Tbsp shortening or 1/2 cup cider vinegar 1 tsp salt 1/2 cup sugar

Shred cabbage with knife; melt shortening in an iron skillet. Add cabbage and other ingredients. Cook gently, covered, for an hour or more. This is an old German recipe and is excellent. The cabbage retains its color and is crunchy and sweet. Port Royal Baptist Church Cookbook.. Port Royal, Ky.

#### Joan's Pickled **Baby Carrots**

2/3 cup white vinegar 2 Tbsp mustard seed 2 lbs. baby carrots 1/2 cup honey 1 tsp salt 2 tsp dried dill weed Whisk vinegar, mustard seed, honey, and salt in large bowl until well-mixed. Cook carrots until tender crisp, about (Continued on next page)

## **Kitchen Stove Doubles As A Furnace**

"It takes up to 24-in. dia. wood and has a cooking surface as well as an oven. The best feature it that it also heats the house," says James Finch, Roxbury, N.Y., about the kitchen stove he designed and built.

The top of the firebox serves as the stove-top cooking surface. Hot air runs from under the stove top to the oven, positioned above and to the right. Air flows up and around the oven to a plenum. From there the air is ducted to each room in the house. "Usually with wood stoves, the heat stays around the stove but with my design it travels to all parts of the house, and the cool air goes back up around the stove," says Finch.

There's a convenient wood storage area under the oven.

even have to touch them. Made in Sweden, the Trix tick remover looks like a ball point pen. It has a button on top and a lasso device - a small carbon filament - at the bottom that grabs the tick.

To remove a tick, you push the button down to extend the loop and slide it over the tick. Removing your finger from the button causes the loop to retract. You then raise the remover a little to "snare' the tick and give the tool a quick twist.

Removing the tick with a twisting motion instead of a pulling motion makes the removal virtually painless and reduces the risk of leaving the head under the skin.

Sells for \$9.95 plus S&H.

# He Counts On Sheep For A Great Night's Sleep

Lloyd Peterson depends on sheep for a good night's sleep, but he doesn't count them. He sleeps on them.

For the past two years, the Harmony, Minnesota entrepreneur has been stuffing mattresses and pillows with virgin wool and selling them direct to customers at bargain prices.

Peterson first discovered the benefits of all-wool mattresses 40 years ago. "I was helping an elderly neighbor prepare her things for an auction, and she pointed out a wool mattress that was 100 years old," recalls Peterson. "I bought it for 25 cents and took it home. We liked it so much we had the wool cleaned and recarded and we still use it today."

Peterson claims that sleeping on a wool mattress is like nothing else. The all-natural fiber wicks away moisture in the summer, but insulates in the winter. The curative claims for wool, which include relief for osteoporosis, fibromyalgia, degenerative disc diseases, and increased circulation, are a personal issue with Peterson as well. His wife was diagnosed with rheumatoid arthritis 20 years ago, and the doctor predicted she would soon be in a wheel chair. She gives her wool mattress credit for still being on her feet and active in the family business, including helping make the company's new all-wool mattresses and pillows. Local public health agencies have been among High

"I had one lady buy a mattress and call me a month later," explains Peterson. "She said she hadn't had a good night's sleep in 20 years until she bought our mattress. Once people sleep on wool, they won't sleep on anything else."

High Point buys wool from Minnesota and Wisconsin sheep producers, ships it to either Poland or Scotland for processing and then back to southeastern Minnesota. There, the long rolls called rovings are laid down inside a mattress cover in a tight pattern, one layer at a time. Each of the seven layers are laid down perpendicular to the previous layer, with the final two layers extending out and over the ends of the previous five layers. Once the mattress cover is zipped up, the mattress is slid onto a frame where yarn is threaded through the cover and its seven layers to secure the mattress in its final form. Covers are made from 100% cotton ticking, or an optional water resistant covering.

Lloyd Peterson stuffs mattresses and pillows with virgin wool and sells them direct to customers at bargain prices.

Peterson's son Larry realized that by shrink wrapping and vacuuming out the air in a mattress or pillow, shipping costs could be cut significantly. Once mattresses are delivered and released from the packaging, they quickly regain their 5-in. thick original shape.

High Point mattresses range from \$268.60 for a single to \$425.00 for a king-size, a fraction of the \$2,300 or more that other all-wool mattresses sell for. Pillows sell for \$34.95 each. The Peterson's take custom orders and make small travel mattresses for campers, truckers and others who want to sleep on wool wherever they go. They also make leg wrappings for people with poor circulation, as well as pads for recliners.
