

MAKES ANY DESK OR DRESSER A SAFE

Portable Strongbox Locks Into Drawers

If you worry about valuables, but not enough to spend hundreds on an expensive safe, you'll want to take a look at Porta-Vault, a "thief-proof", spring-loaded strongbox that jams itself into any sliding drawer.

"To steal it, you'd have to rip the furniture apart. Most thieves want to come and go quietly and won't do that," says a company spokesman.

The portable safe goes anywhere — requires no installation — and the key feature is a patented, spring-loaded double lid mechanism. Just slip it into the top drawer of a desk or dresser, and let both the inner and outer lids spring open. Then, close the inner lid, which locks the outer lid in an open position — it won't pass the drawer bead but will open far

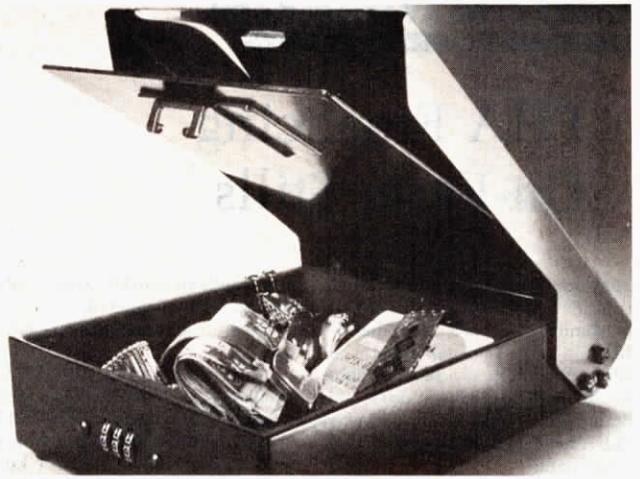

enough to let you reach the combination. When unlocked, the inner lid springs open, releasing the outer lid.

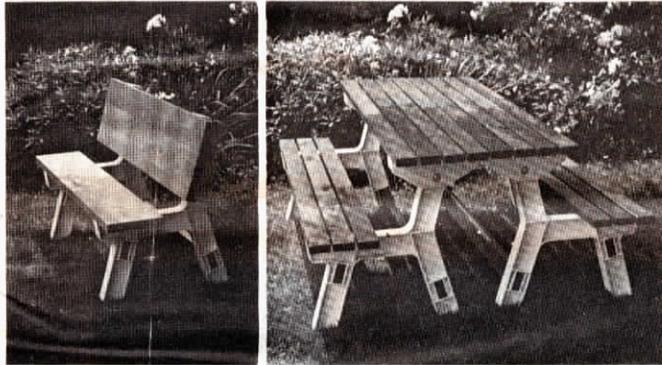

The Porta-Vault — 9 by 6 by 2 in. in size — is made of steel and weighs 3 3/4 lbs.

Cost for the portable safe is \$49.95.

For more information, contact: FARM SHOW Followup, Aggogle, Inc., 80 Fifth Ave., Suite 1506, New York, N.Y. 10011 (ph 212 924-0438).

Top lid of Porta-Vault locks on drawer bead and unlocks only by combination.

The bench turns into a table when needed simply by turning the back up.

TWO TOGETHER MAKE A PICNIC TABLE

Do-It-Yourself Bench Doubles As A Table

Inside or out, as a bench, picnic table or drawing board, you'll find plenty of uses for this new table-bench kit that readily adapts to your specifications and to your choice of wood.

Here's how Kent Woodworth, marketing manager for Taylor Co., Inc., Gloversville, N.Y., describes the new do-it-yourself kit:

"We supply the legs, brackets, screws and plans — the buyer supplies the wood. Using 2 by 4's, 2 by 6's or any comparable dimension wood, you can build a bench up to 8 ft. long.

"The legs and flip-top back brackets are formed from a special polyethylene "structural foam". The legs come in basic white or can be painted. Special paints are needed,

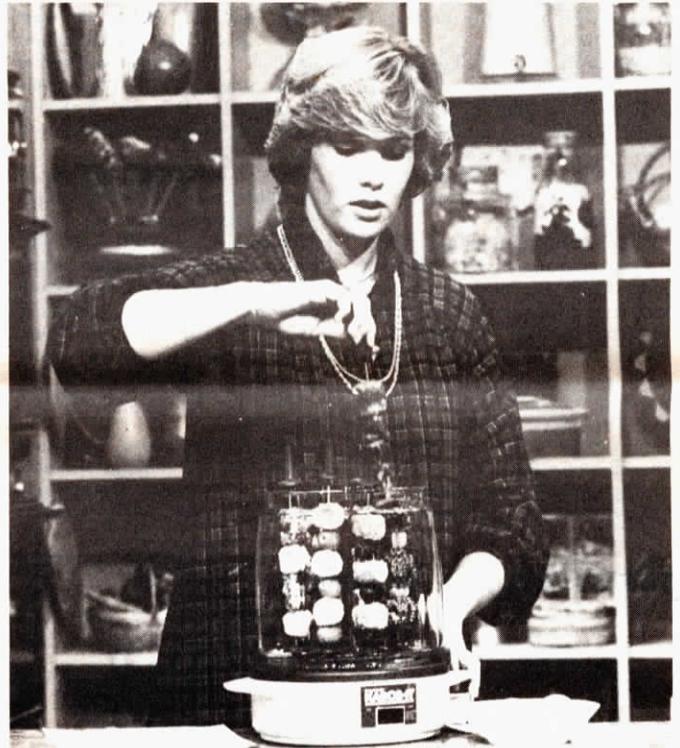

however, to adhere to the smooth surface."

Woodworth says the most popular way to finish the kit is using all 2 by 4's — three on the bench seat, four on the flip-top and two as leg braces. Boards can be stained or varnished as needed, and quickly screwed to the table with 44 screws provided.

The table locks into the "up" position with a quick-release latch. Put two together and you have a standard-size picnic table.

Each leg assembly weighs 9 lbs. and a set of two sells for \$39.

For more information, contact: FARM SHOW Followup, N.A. Taylor Co., Inc., 10 West 9th Ave., Gloversville, N.Y. 12078 (ph 518 725-0681).

New Kabob-it got a recent try-out on ABC's "Good Morning America" show.

DIFFERENT "TWIST" TO COOKING

New Shish Kabob-It Makes Skewing Easy

Great for varied menus or feeding your family in shifts, the new Kabob-It from Wear-Ever Aluminum holds up to eight skewers, slowly turning them around a central, self-cleaning electric heat element. Juices drain into a stick-proof, removable drip cup — to keep clean-up short and quick.

Most any meat or vegetable can be skewered on the Kabob-It. Simply

thread it with your favorite food selections — suggested recipes are provided — and plug it in on the table or counter. A clear Pyrex cover prevents grease splatter. The average meal takes from 10 to 20 min. to cook.

For more information, contact: FARM SHOW Followup, Wear-Ever Aluminum Inc., 1089 Eastern Ave., Chillicothe, Ohio 45601 (ph 614 775-9100).
