

## Safe Way To Cut Tree Limbs

The LIMBHOG is a new tree trimming attachment that mounts directly to the front-end loader of a tractor, skidloader or backhoe. The commercial grade chainsaw slides easily into a receiver on the front-end loader and works off the tractor's auxiliary hydraulics.

The LIMBHOG's 8-ft. mast allows it to reach limbs 8 ft. higher than the bucket's reach. It reduces the risk of injury by eliminating ladders, ropes and standing in the tractor bucket. Limbs fall in front of the loader while the operator sits safely and comfortably in the tractor seat.

The LIMBHOG runs at 5,500 rpm's and cuts 5-in. dia. limbs in just over one second. Since it runs off the tractor's hydraulics, there's no gas engine noise or exhaust, and kickback is completely eliminated. The LIMBHOG comes equipped with a self-oiling system and weighs only 68 lbs. making it easy to attach and be operated by one person. It also has the unique feature of reversing the chain to back out of a pinch.

The LIMBHOG usually retails for \$2,495, but the company has periodic specials, so call for current pricing. The unit has a one-year unconditional warranty and comes completely assembled and pre-tested with an extra chisel chain. Price includes shipping.

The website includes a video of the LIMBHOG in action.

## Horse Whisperer Teaches Skill To Others

*The only school of its kind in the world!!*

When Larry Surrett whispers to a horse, it listens.

"I can train a horse to do anything physically possible, whether to jump in a pickup as it drives away or lay down and play dead when you point at it and say bang," says Surrett.

Not only does he train horses, but for the past 11 years he has taught their owners as well. The course at his Minnesota Horse Training Academy is an intensive education, regardless of a horseman's background.

"I had one 74-year-old man tell me he learned more in two days than he had in a life time of working with horses," says Surrett.

He tells of one young woman who came to class with a freshly purchased \$700 horse and trained it in class. A week after the class, she sold it for \$5,000.

"Some people who take the course are professional horse trainers who want to be better, and others just want to connect with

their horse," says Surrett. "I have had unbelievable success stories, including one gal who made \$36,000 her first year after the course. She trained horses on the side while staying home with kids."

There are 1, 2 and 3-week programs available ranging from \$1,200 to \$3,600. "We have the best program in the industry with a money back guarantee if you're not satisfied," says Surrett.

## IH "Disgusted" Shift Kits

"If your older IH tractor sometimes slips out of gear or does not go into gear, or if you're just frustrated with the way it shifts, we can probably help," says Otto Wenz of Wenz Service, Inc. "We had some of the same problems with our own tractor and figured out a way to fix it that worked better than anything we could find.

"We now offer complete kits to solve shifting problems for IH models from the 706 up to the 6788. Most of the problems with these tractors come from the gears in the transmission not being fully engaged. Different tractors need different parts, so while we do have complete repair kits, we'd prefer to sell only the parts needed. For this reason, farmers or their mechanics should call for parts and prices.

"All of our transmission repair parts are guaranteed. We guarantee the '06 series parts for the life of our business. Kits for most other models come with a 10 year guarantee. We've sold more than 5,000 kits in our nearly 30 years in business. The cost of repairs with our kits are usually less than half the cost of using parts from Case IH.

"In addition to IH transmission repair parts, we also sell a number of new after-market parts for almost any make of tractor. Our parts cost a lot less than most places for most brands."
