

## A Penetrating Sealer That Is Permanent

Most sealers last from 1-3 years and then we do it all over again. X-tend and X-tenda color sealers are a permanent solution to this problem because the silicone base sealer penetrates into the surface and gives permanent protection. The penetrated silicone has been tested for over 60 years showing very little UV breakdown, which is the biggest enemy to any sealer or paint.

Most surfaces can be permanently protected, such as blacktop & concrete driveways, steps, sidewalks, barnyard slabs, brick, stone, asphalt shingles, log homes, decks, shakes, sidings, canvas, cloth, plastic, fiberglass and steel surfaces and the list goes on.

The sealer enhances the color of faded pavers and protects and holds the color. Color pigments can be added for a change of color. The sealer protects the natural color or stained color of wood, plus it protects against termites and other insects. The sealer protects concrete and wood from oil, gasoline, salts, all weather elements and most acids and chemicals.

Besides many home uses, there are many more commercial and industrial uses. The sealer is ideal for boats and yachts and many marine uses such as, protection against the growth of seaweed, algae, scum, barnacles, etc.

The preservation of the protected surface is very inexpensive over the long haul.

## Rodenator Now Sells Factory-Direct

Are burrowing pests getting you down? Eradicate your Gophers, Prairie Dogs, and other burrowing pests with a Rodenator! Specifically used to eliminate burrowing pest animals, the Rodenator line of pest control products use a calibrated mixture of propane and oxygen to destroy burrowing animals and the homes they live in.

Now being sold factory-direct, the Rodenator line of burrowing pest control products can be yours for a whole lot less. By purchasing direct from the factory you will save a bundle.

With three different models to choose from, the Rodenator line of "Concussive Force" Burrowing Pest Control products has a model for everybody.

The Rodenator Pro or R1 comes as a complete system that now sells for only \$1395.00 plus shipping and handling.

The new Rodenator R3 is a "stand away" version of our Rodenator that allows the user to control the operation from 8 meters away by way of an ignition cord. It sells as a complete system for \$1695.00 plus shipping and handling.

The Rodenator remote control device, known as the R2, is on sale for \$1995.00 plus shipping and handling.

All systems are complete with the exception of oxygen and propane tanks, which is provided by the customer.

(All prices are for shipping to US addresses.)

A mixture of oxygen and propane are injected underground and then ignited by the Rodenator to kill underground pests. You can see videos, photos and more information at the company's website: [www.rodenator.com](http://www.rodenator.com).

Please visit [www.rodenator.com](http://www.rodenator.com) to see the complete line of Rodenator "Concussive Force" products, or call 1-800-750-4553.

Stop by and see all three Rodenator models at our booth during the World Ag Expo in Tulare CA, or the National Farm Machinery Show in Louisville KY.
