

# The "Axceller" Kit Rotor Conversion Kit

"Cleaner grain samples"... "Feederhouse rumble gone"... "Improved forward speed and fuel economy"... "Incredible difference, especially in tough conditions". These are just a few of the comments coming from producers after installing a The "Axceller®" Kit.

- Fits all existing Case rotors 1440 to 2388.
- Field installable. No welding or cutting. Bolts into place.
- High-speed balanced before leaving the factory.
- Takes away feeder house rumble.
- Improves feeding...especially in heavy and tough conditions.
- Works with both specialty and standard rotors.
- All wear components are hard surfaced.
- Together with specialty rotor can enhance combine capacity up to 20 percent in tough conditions.

The "Axceller®" Kit has proven itself in just about every crop including wheat, oats, soybeans, corn, rice, and peas. It's now improving harvesting on three continents.

Stewart Steel also manufactures:  
**"The Extender"**  
Combine Unloading Auger Extension Kits  
For Most Makes

Because there is nothing to weld, cut or drill and it attaches to your existing rotor, the "Axceller®" Kit is a very economical and practical alternative to a major change-out. Also, because your rotor stays in place and the "Axceller®" Kit is pre-balanced, the 6-hour (typical) installation can be done in the field...eliminating costly shop and down time.

The "Axceller®" Kit is distributed in the U.S. through Maurer Mfg., Spencer Iowa, (ph 888 274-6010) and by West Country Products, Jamestown N. Dak. (ph701 251-2182).
