

Stretching Device Worn At Night Relieves Carpal Tunnel Syndrome

"I talk to CTS sufferers daily, who are having terrible hand pain, annoying numbness in their fingers and a weak grip. Often they are scheduled for surgery. They try the Carpal Solution as a last resort and within a few days or sometimes a few weeks, they feel relief and cancel the surgery," says Karen, Customer Service Manager at First Hand Medical.

Dr. Clyde E. Morgan, Jr. invented the Carpal Solution, a 6-week therapy using a unique flexible hand brace, because his wife suffered from a difficult case of CTS. Knowing the downside of the surgery, he was determined to identify a better therapeutic method. Carpal Tunnel Syndrome occurs when the main nerve that runs from the forearm into the hand is pinched in the wrist, causing numbness and pain or tingling. Symptoms are often worst at night interrupting sleep and causing drowsiness during the day. It's frequently caused by repetitive use of your hands.

Dr. Morgan's device is a comfortable flexible brace that you put on before retiring to bed and throw away in the morning. The brace has been carefully designed to match the elasticity of your hand and applies consistent gentle massage action at three key points on the palm of your hand. You wear one each night for 2 weeks, followed by every other night for 4 weeks, to put your symptoms in remission.

The brace has three adhesive straps that gently stretch and reshape the soft tissue surrounding the carpal tunnel while the hand is relaxed during sleep. It decompresses the soft tissue in the hand, relieves pressure on the median nerve, increases flexibility and enhances blood circulation for natural healing. Most people feel relief from their worst symptoms within two weeks. Carpal Solution Therapy worked for Mrs. Morgan. She is now pain free and back at work with a full night's rest – no more sleep interruptions from numb tingling hands.

The Carpal Solution is a much better first line of defense. It works for over 97% of CTS sufferers, is gentle and avoids the complications of oral pain medications, rigid restrictive splints, steroid injections and high risk surgery.

The complete 6-week therapy pack sells for \$84.95 per hand plus \$7.95 for shipping and handling. First Hand Medical has a guarantee that if you don't feel some relief after 5 weeks, just send back the treatment package and they'll refund your money. There is no downside, no downtime nor risk of complications. Health Insurance Companies and Medicare reimburse most of the cost with a Doctor's Prescription for a: Hand Wrist Orthosis. Watch the video interview

of a doctor and wellness expert, discussing causes, prevention and this all natural treatment at the most comprehensive CTS site on the internet: www.MyCarpalTunnel.com. You can also watch a video of a surgical nurse who avoided surgery and tells why you will want to avoid surgery, too.

Westendorf Mfg. Co. Launches New Freedom Mount Loader Series

"It's so simple you'll wonder why someone didn't think of it sooner," says Westendorf Mfg., a leading loader manufacturer for decades. The company recently introduced what they say is the strongest and most innovative loader on the market. It features a low-profile arched arm and big bucket with revolutionary remote coupler that changes attachments from the cab with just a push of a button.

The appearance alone makes it stand out

from the crowd.

The conveniences packed into this loader include a simple bracket design that allows the most turning freedom of any loader, matching the tight turning ability of today's tractors. The state-of-the-art hydraulic system is protected and out of sight. It features an amazingly simple, yet

reliable plug-n-play connection.

The auto-locking Freedom Mount and dismount system ensures you'll have the loader on or off in just seconds without using tools, pins or awkward troublesome stands. Enjoy extended lift height for those high-to-reach tasks, and a bigger/stronger time-saving bucket with a bolt-on cutting edge, unbelievable dumping angles and "water" holding roll-back. You can check for your fit online.

Contact: Westendorf Mfg. Co., Inc., P.O. Box 29, Onawa, Iowa 51040 (ph 888-277-6518; www.loaders.com/freedom).
