## Portable Power Bench® Makes Work Easier

Are you tired of working on your knees? Out of space or wanting to get things done faster? Then the Power Bench® can help. The Power Bench is a heavy-duty portable workbench that stores in the size of a step-ladder and rolls on 2 wheels. In less than 1 minute you can set it up, far faster than you can clean off your old workbench. Plus it goes where you want it.

The Power Bench is adjustable in height with spring-loaded pins from 30 to 41-in. for your comfort. It's extremely durable

and the only portable workbench that's strong enough to hold oil field pipe. Ideal for wood or metal chop saws. It makes a great welding table and, by adding plywood, they make a great mechanic's bench or camp table. With your imagination the uses are unlimited.

## Overhead Valve Conversion Kit

"We had many requests for overhead valve kits for 260, 289, 302, and 351 cu. in. Ford Windsor engines in N-Series tractors," says Don Knasel.

He says the 302 is the engine of choice, since you can often find a good one for a couple hundred dollars. Knasel also engines on hand for sale.

The kit includes bell housing adaptor, engine cradle, oil pan cover, radius arm extensions and spacer, tie rod extensions, Bendix cover, starter spacer, flywheel shield, new engine flywheel drilled to fit your N-Series pressure plate and clutch, aluminum dash

extension, dash gasket, choke cable and all nuts and bolts needed. Comes with raised hood or original height. You use your own N-Series radiator with a 12-volt 16 by 16 fan (easy to pick up at a junk yard). Sells for \$1,295 plus S&H. Header-type manifolds and fuel tanks are also available.
