

“Battery Maintenance In A Bottle”

“Battery Equalizer was developed in Europe over 25 years ago and it can double the life of any vehicle’s battery by reversing the built-up sulphation that kills batteries as they get older. It’s the biggest improvement in battery chemistry in 75 years,” says Ken Hardesty of Battery Equalizer.

As soon as electrolyte is added to a new battery fresh off the assembly line, sulfation begins coating the lead plates. This causes internal resistance that lowers overall performance and, in a few years, chokes out all electrical activity. Battery Equaliser is designed to mix with the battery’s electrolyte solution, dissolving existing sulfation and preventing new deposits from forming. Treated batteries will charge faster and hold a charge longer.

Simply top each cell with ½ to 2 oz. of Battery Equaliser, depending on the size of the battery (some large industrial

batteries may need a bit more). Batteries can be treated annually or as needed.

Battery Equaliser is now sold in 30 countries with at least 3 million batteries treated to date.

To recap the benefits:

- Doubles battery life
- Faster charge and runs longer
- Store your vehicle 3 times longer
- A 12-oz. bottle sells for \$19.95 plus S&H

To order contact: Oregon Ag 877-656-0067 (1150 E Oregon Rd, Lititz, PA 17543) or you can order online at www.batteryequaliser.com. For more information, call 888-851-4431.

Performance-Boosting Combine Products

Deere Chopper Knives - If you’re not satisfied with the job done by the straw chopper on your Deere combine, contact Robert Rottinghaus.

Rottinghaus, owner of Clever Tech, Inc., Jesup, Iowa, says the rotor knives on Deere straw choppers aren’t heavy enough to handle heavy straw or wet, green bean stems.

“Many modern soybean varieties produce dry beans on green stems, which can cause problems for combines and straw choppers. Since the original knives in the Deere chopper pivot back about 30 degrees, when they hit this tough material they let it pass over the stationary knives uncut,” he says.

To solve the problem, he developed a heavier knife that will fit most Deere straw

Deere Chopper Knives

choppers. Made of grade 80 steel that’s been laser cut, the Clever Tech knife has four sharp rake teeth on it, to make a serrated edge. It’s designed to pivot only 10 degrees, so it forces material through the stationary knives until everything is cut.

Rottinghaus’ combine straw chopper knives sell for \$7.87 each (plus S&H), depending on the model. All knives are weighed and balanced before shipping.
