

Strawberry And Livestock Growers' Answer To Uniform Winter Coverage

According to Double R Manufacturing, there are 12 Reasons why the BeddingPro tractor-mounted straw spreader is your best choice for mulching crops and bedding livestock:

1. It requires just 40 hp, which means great fuel savings, and a minimum of dust and noise.
2. The compact design suits confined areas.
3. It offers controlled and uniformed distribution, which means less time and less waste.
4. Less waste means less straw used.
5. Less product means you don't harvest as much, or you have extra to sell.
6. If you don't need as much product, that's less you have to purchase.
7. Can be used on skid steer or tractor.
8. BeddingPro shreds canary grass, straw, frozen bales, silage and corn silage.
9. The BeddingPro costs a fraction of other brands.
10. Weighs less than 1200 lbs.
11. It is well-built, low maintenance and has no exotic parts.

Bale shredder attaches to a 3-pt. hitch or quick-tatches to a front-end loader.

12. It also has self loading, extra bale carrying capability, wide spreading option and hydraulic model.

Grease Joint Rejuvenator®

Have you ever tried to grease a joint on a piece of equipment but couldn't? No one could tell me why so I took off the blade from my 650G Dozer and examined every problem joint. Hardened grease and dirt in the bushings' relief slots were the culprits! Heat and dirt had dried up the grease and clogged up the relief slots. No amount of pressure on the grease fitting would push the new grease into the joint.

The Grease Joint Rejuvenator opened up the joint in a minute! I filled the tool with light penetrating oil, burped the air out, and attached the coupler to the grease fitting.

Tapping the piston of the tool with a hammer forced the light oil into the joint, allowing the relief slots to open and push out the old, dried up grease. Then the new grease went in effortlessly.

Gator Jaws® Remove Stubborn Filters

Gator Jaws® are the most versatile filter pliers for removing all spin-on type filters in tractors, trucks, cars, SUVs, and heavy-duty equipment. These patented pliers have angled gripping teeth and jaw to grip and remove even the most stubborn stuck filters. The 23-in. long handles and aggressive biting teeth provide maximum leverage, grip and torque. The special bends and angles let you get into tight spots. The Gator

Jaws® grip 2.5 in. to 12 in. diameter filters and can remove fuel, transmission, hydraulic, canister type filters, fuel tank sending units, and more. Made & assembled in USA.

Caddy carries trimmer on a pair of cushioned wheels.

String Trimmer "Caddy"

If your back and wrists hurt after running a gas-powered string trimmer, you'll like this new two-wheeled cart that makes the job a lot easier.

The Kwik Whip Cart is designed to accept most existing gas or electric-operated string trimmers. It rides on a pair of large cushioned wheels and has an L-shaped metal tube that the trimmer clamps onto at two different points. The clamp points have anti-vibration pads and adjust easily to different-size trimmers. It lets you trim under trees and other hard-to-reach places with less bending and stretching.

MSRP: \$99.95

Sale price: \$49.95 including S & H, Canadian residents S & H \$35.00. (No credit cards, please)
