

## “Thumb Hole Sleeve” Waterproof Jackets And Pullovers

Following the remarkable success of their “Waterproof Milking Sleeves with Thumb Hole”, Udder Tech has created waterproof jackets and pullovers with a thumb hole sleeve sewn right in

The sleeves extend past the wrist and come with a loop to slide the thumb through. The innovative jacket design keeps water and debris from getting into your sleeve. Protects wrists that may be sensitive to moisture, manure and teat dip. Works great for power washing and for jobs where you’re working over your head, such as washing pipelines.

As with all of Udder Tech’s waterproof jackets, these new jackets come with roomy raglan sleeves so you won’t get bound by a tight shoulder. The full zip jacket features

a full length zipper and two front pockets, while the pullover jacket has a half zipper with one large pocket on front. Available in blue.

The price of the Thumb Hole Sleeve Jackets is the same as Udder Tech’s traditional jackets and pullovers.

Small, medium and large jackets sell for \$41.99 plus S&H; X-Large sells for \$44.99 plus S&H; XX-Large sells for \$52.99 plus S&H.

## Best Penetrating Oil Is The Cheapest

Machinist’s Workshop magazine recently tested penetrating oils for break-out torque on rusted nuts. They “scientifically rusted” a bunch of nuts, treated them with various penetrants, and then measured the torque it took to remove them. Here are the results:

- Nothing 516pounds
- WD-40 238pounds
- PB Blaster 214pounds
- Liquid Wrench 127pounds
- Kano Kroil 106pounds
- ATF-Acetone Mix 53 pounds

The ATF-Acetone mix was a “home brew” mix of 50-50 automatic transmission fluid and acetone.

Note that the “home brew” was better than any commercial product. Note also that Liquid Wrench was as good as Kroil for about 20 percent of the price.

Thanks to reader Larry Heineman at L&G Products Co. (manufacturer of “Add-A-Stick” excavator extensions - www.add-a-stick.net) - for passing along this story.

## HyReach Clipper® Cuts Any Wood!

The HyReach Clipper can cut up to a maximum 9 to 12 in. dia. tree or limb in a single cut, depending on the shape. The clipper cuts all kinds of trees including hardwoods. The long reach keeps the operator away from brush and thorns.

The patented clipper can cut horizontally for ground level cutting or vertically for hard to reach limbs. The clipper has been especially useful for clearing fence rows and

removing overhanging limbs along fields. The clipper attaches to most skid steers and tractors as well as other equipment with hydraulics.

## “Add-A-Grapple” Fits Any Loader Bucket

Contractor

Single

Double

Grapple Rake

“Our new add-on grapple fork fits any loader bucket. It’s great for removing brush, debris, and other hard-to-handle material. It can quickly be removed, allowing you to use the bucket for other jobs,” says Bill Reed, Precision Mfg., Sedalia, Mo.

The grapple fork comes with a telescoping mounting frame that attaches to each side of

the bucket with four bolts. You can fit it with a single or double grapple.
