

# Stretching Device Worn At Night Relieves Carpal Tunnel Syndrome

"I talk to CTS sufferers daily, who are having terrible hand pain, annoying numbness in their fingers and a weak grip. Often they are scheduled for surgery. They try the Carpal Solution as a last resort and within a few days or sometimes a few weeks, they feel relief and cancel the surgery," says Karen, Customer Service Manager at First Hand Medical.

Dr. Clyde E. Morgan, Jr. invented the Carpal Solution, a 6-week therapy using a unique flexible hand brace, because his wife suffered from a difficult case of CTS. Knowing the downside of the surgery, he was determined to identify a better therapeutic treatment. Carpal Tunnel Syndrome occurs when the main nerve that runs from the forearm into the hand is pinched in the wrist, causing numbness and pain or tingling. Symptoms are often worst at night interrupting sleep, causing drowsiness and irritability during the day. It's frequently caused by repetitive use of your hands, but there are 15 other possible contributing factors. Learn more at the company's website.

Sleep loss is the most dangerous aspect of Carpal Tunnel Syndrome, because it can lead to more serious conditions, like high blood pressure, heart disease, strokes, etc.

Dr. Morgan's device is a comfortable flexible stretching brace that you put on before retiring to bed and pitch in the morning. The brace has been carefully designed to match the elasticity of your hand and applies consistent gentle stretching mas-

sage action at three key points on the palm of your hand. You wear one each night for 2 weeks, followed by every other night for 4 weeks, to put your symptoms in complete remission.

The Carpal Solution gently stretches the soft tissue surrounding the carpal tunnel. It decompresses the tissue, restores flexibility and circulation and relieves pressure on the median nerve for natural healing. Most people feel relief from their worst symptoms within 2 to 3 weeks.

Neurologists call the Carpal Solution the best first line of defense for CTS. It works for over 97% of CTS sufferers, is gentle and avoids the discomfort, muscle atrophy and restrictions of rigid splints and the serious complications of oral pain medications, steroid injections and high risk surgery.

The 6-week therapy pack costs \$92.90 delivered to your home. First Hand Medical has a guarantee that you will feel some relief within 30 days, if not just send it back and they'll refund your money. There is no downtime, no downside, and no risk of complications with the Carpal Solution.

## Attention Propane Users! Save Time And Money!

TankQ is a light that installs on your storage tank that flashes when it's time to refill. Unit begins to flash when tank level drops below 25%. 25% allows tank owners plenty of time to shop for the best price, and all users plenty of time for normal delivery rates.

Installation: DIY or your propane supplier. TankQ safely and easily mounts on to the lifting lugs on the tank and connects to the Remote Ready dial in seconds.

Inexpensive replacement Remote Ready dials are available from your propane supplier. Dials are available for all ASME storage tanks and some dealers replace them for free.

TankQ is available in two sizes, taller unit [shown] is designed for areas of high snow cover. Units sell for \$36.99.

Visit us at [www.tankq.com](http://www.tankq.com) to order and

**Alarm attaches to lifting lug on tank. It lights up when tank gets down to 25 percent full.**

for more information.
