

Facemask is made of neoprene with a replaceable carbon filter.

## Facemask Filters Out “Everything But The Air”

If you work or play in dusty conditions, you’ll like this comfortable new mask that’s made of neoprene with a replaceable carbon filter.

“Other than a simple surgical facemask, there are really no non-powered masks on the market that have a replaceable filter,” says Steve Torbenson, company spokesman for the new RZ Mask that filters out “everything but the air”.

With a surgical mask, the filters are n95 rated, meaning they filter out at least 95 percent of particles from the air. The RZ-Mask filters have a rating of n99, filtering at least 99 percent of airborne particles, including particles as small as smoke.

The mask was developed in Minnesota for use on all terrain vehicles, but many farmers and others are discovering how convenient and comfortable it is to use.

The neoprene mask is hand washable. “The replaceable carbon filter will filter out fumes and odors. We generally recom-

Mask is hand washable.

mend changing it after 8 to 12 uses depending on conditions,” says Torbenson.

The mask and filters are for sale on the company’s website, in farm supply stores, and at various powersports shops around the country. The mask sells for \$29.99 and replacement filters come in packs of three for \$6.95.

## Easy Way To Plug Tire Leaks

This company’s new tire repair kit allows for an “on the spot” and “on the wheel” repair to virtually any tubeless tire, and it seals the puncture on the inside.

The Plugger is a spring-loaded gun that “drives” the plug into the hole. The shaft of the plug expands under pressure to fill the puncture. The mushroom head of the plug seats on the inner wall, allowing no air to escape.

The tool comes in a vinyl-zippered 6 by 9-in. pouch and weighs just under 2 lbs. Included is the plug gun, nozzle, probe tool, reamer/rasp tool, retractable blade, and 25 rubber mushroom plugs that measure 5/16 in. in diameter and 3/4 long, along with detailed instructions.

Sells for \$43.95 plus S&H. An extra bag of plugs sells for \$7.50 plus S&H. (FREE SHIPPING, if you order both at once.)

## Tree Puller Also Removes Roots And Stumps

You can remove trees, roots, and stumps with this new tree puller from Precision Mfg., Sedalia, Mo.

The tree puller is equipped with double rows of teeth that form jaws. When both rows of teeth are closed they form spade points that can be used to dig out roots and loosen the soil, allowing you to remove the entire tree. A “root ripper” located on top of the blade can also be used to cut roots when digging.

“Using two rows of teeth results in increased pulling power compared to other brands with just a single row of teeth.

As a result, the tree is far less likely to slip through,” says owner Bill Reed. “The unit can also be used to remove posts and stakes or even to move large rocks and boulders.”

Two models are available: Model 515 has a 12-in. opening between the jaws and retails for \$2,695; model 525 has a 14-in. opening and retails for \$3,295. Hydraulic hoses are included in the price; quick-tach mounting brackets are sold separately.

Contact: FARM SHOW Followup, Precision Mfg., 424 North Harding Ave., Sedalia, Mo. 65301 (ph 888 497-3224; breed@precisionmfg.com; www.precisionmfg.com).
