

## Portable “Garden Sink”

“I put together a portable garden sink so I can wash vegetables outside before bringing them into our house. Both the water and dirt go right back into our garden,” says Ken Carpenter, Grangeville, Idaho.

He bought an old kitchen sink at a second hand store for a few dollars. He built a wooden frame in the shape of a wheelbarrow and screwed the sink on top of it. The wheelbarrow rides on an 8-in. high rubber wheel and has handles that measure about 7 ft. long. He also added a female coupler to the bottom of the faucet so he can hook up a garden hose to it.

“I have several faucets around my garden and I can hook the sink up to any of them,” says Carpenter. “I use it on all my root crops including beets, potatoes, and carrots. I added a length of L-shaped pvc pipe to the sink’s drain so my feet don’t get wet while I’m washing vegetables. I stand in front of the sink and the water drains out the back. At the end of the growing season I just disconnect the hose and roll the sink into our tool shed.”

## Drive-Thru Electric Gate

The Koehn family began their ag equipment company 40 years ago with this now-famous Drive-Thru Electric Gate.

You can simply drive through the spring-loaded gate from either direction with any vehicle without ever having to stop and open or close the gate. Uses any electric fence controller. One spring on each arm brings them back to position after you pass through.

Sells for \$159 for a 13 to 19-ft. adjustable gate or \$169 for an 18 to 24-ft. gate.

“Whip Flag” consists of a fabric flag attached to a flexible polypropylene-coated shaft.

## “Permanent” Replacement Seals For Deere 30, 40 Series Tractors

A Missouri machine shop that got tired of replacing leaky load control shaft seals on Deere 30 and 40 series tractors came up with heavy-duty “PERMANENT” replacement seals.

Boling Machine Shop, Lenter, Mo., says Deere’s seals often start leaking after six months or less. Boling has been making heavy-duty replacements for 20 years. The replacements are machined out of steel with Teflon liners, O-rings, or neoprene washers, depending on model. The O-rings, liners and washers can be replaced without replacing the seals. The 4020 seals also fit 4010, 5010, 5020 and some applications of 4000 models.

The 3020 seal also fits 2510, 2520, 3010 and 4030 tractors. A 4520 seal also fits 4620, 7020, and 7520 tractors. This series sells for \$60 a set.

The company also has seals and bushings for newer tractors which include 4440, 4230, 4240, 4320, 4430, 4440 and 6030. Each set contains two hardened steel bushings which have a wider surface to reduce shaft wear and two seals with replaceable inserts. They sell for \$90 per set.

We also sell load control shafts for most models. New seals this year are, 2950, 2940, 2840, 2850, 2855, 2550 and many others. All seals are fully guaranteed.

Permanent replacement seals don’t leak like factory seals, says Boling Machine.
