

## “Slippery Plastic”

Pictured below are just a few of the items that Osseo Plastics & Supply manufactures using Hi-Density polyethylene.

“We also distribute Hi-Density polyethylene in various size sheets and rolls. Sheet

### PVC Strip Doors

sizes range in width from 24 to 72 in., and up to 10 ft. long. Rolls (100 ft. long) are available in 24, 30, 36, 48, 60, 72, 96, and 120-in. widths.

“We also offer extra-tough UHMW polyethylene, in various widths and lengths, for

lining extra high-wear areas. Some of the items we line are mangers, manure spreaders, barn cleaner chutes, feed conveyers, silo

chutes, feeder wagons, TMR mixers, chopper hoods, silo unloaders, Haybine shoes, feed carts, truck boxes and feed bunks.”

## Replace Tractor Points With Electronic Ignition

Converting to an electronic breakerless ignition system is a simple option for owners of old tractors with points and condensers. It improves fuel economy and makes starting easier.

“It only takes 15 to 30 min. to install,” says Gary Catron, president of CBS Performance Automotive, which is a distributor of Ignitor® Electronic Ignition systems (www.pertronix.com). Remove the points and condenser, install the Ignitor module, push the Ignitor’s magnetic sleeve on the distributor’s cam lobes, and connect the module wires to the coil.

CBS sells systems for Deere 2-cylinder and older 4-cylinder tractors for \$79. Ignitor systems for some unique tractors run slightly higher. It’s not required, but customers often change the coil (\$39) when they upgrade to the electronic ignition.

“I get feedback that they are getting 10 to 15 percent gas savings,” Catron says. Tractor pullers install the electronic ignition to get more horsepower and torque, and the Ignitor extends spark plug life.

Best of all, there are no points that require

constant tune-up. Ignitor has rotating cobalt magnets and a 1/4-degree timing accuracy from zero to 15,000 rpm’s. It’s encapsulated and protected from moisture, dirt and dust.

## Stinging Nettle Heals Sore Muscles, Joints

Over 10 years ago, Don Scott literally stumbled into the pain-erasing benefits of stinging nettles. Scott, who suffered from severe knee pain, was forced to limp through a nettle patch one day when his tractor stalled. After finally making it back to his home, he was shocked to realize his pain was gone and his mobility was tremendously improved!

From that point, Scott devoted countless hours to researching the nettle plant and testing various forms of pain relief products he created using the nettles. Finally, he developed a way to extract the resins from the plants and apply them to an all cotton cloth... resulting in the all herbal Netical Patch!

It’s no secret that the nettle plant can relieve pain – even the Romans used nettles after battle. But no other nettle product is as versatile and effective as the Netical Patch. The patches, available in three different sizes, can be adhered to clothing or held tight

to the skin with a wrap. They can be used to relieve aches, swelling, and discomfort all over the body – anywhere from the smallest arthritic joints to the biggest overstressed muscles in your body!
