

The Bryan Furnace

With the uncertainty of fuel prices, it's time to take control of your heating cost and switch to an alternative fuel source. "The Bryan Furnace" is the choice that many have made in these hectic times. "The Bryan Furnace" is suitable for almost any type of structure including manufactured homes, log homes, green houses, work shops, paint booths or any type of structure where clean warm air is desired.

"The Bryan Furnace" is a wood burning furnace that sits outside the home and requires no home modifications. The unit can be located within two feet of the house. It requires no shelter as the exterior is either galvanize or stainless steel. The combustion air system, with indoor wall mounted thermostat is available on all models. The Bryan Furnace takes up to 36-in. long logs (45 in. on model 450) and will burn 8 to 12 hrs. with each filling.

Kile® Rotor Flight® Impellers

The Kile® Rotor Flight® Impellers are precision built bolt-on flights which replace OEM impellers on IH and Case-IH combines. These flights mount on either specialty, standard or AFX88 series rotors. Each can be installed without removing the rotor from the combine. Our impellers wear longer and improve threshing performance.

With our unique auger flight design, the Kile® Rotor Flight® Impellers ensure that crop material efficiently spirals through the transition cone reducing peak torque loads, allowing the operator to achieve higher ground speeds and extending the life of both the transition cone and rotor belt. Our flights also reduce gearbox loading and increase fuel efficiency. KXF®88 flights, with our patent pending intake angle, produce the same advantages as our KRF® style flight impeller systems.

Our newest designed (patent pending) K7890 wear plate kits are for Class 7, 8 & 9 Case IH combines. Available in either cast heat treated steel or cast chrome, they are a great value providing outstanding performance with excellent wear ability.

All our flight impeller kits come complete with mounting instructions, hardware & cast chrome or cast steel adjustable wear plates. The 80 Series kit (KRF®80) and KXF®88 series have two flight impellers & wear plates. The 60 Series kit (KRF®60) has three flight impellers & wear plates.

These flights are used in harvesting all

Bolt-on rotor flight impellers are said to dramatically improve threshing performance. They replace OEM impellers on IH and Case IH combines.

crops with complete satisfaction. Made and manufactured in the U.S. by Kile Machine & Manufacturing Inc., Rosalia, WA. Parts price, dealer list & new products are available online.
