Tractor "Transplant"

When the engine went out on his 3788 Case-IH tractor, Ken Adams transplanted the front end off a Deutz diesel right onto the frame. See story on page 2.

Converted Combine Pulverizes Straw

An Oregon innovator recently launched a new business converting older model combines to chop straw. The IH 1480 Axial Flow shown above can no longer harvest grain. It's used to pulverize big straw crops into an even, chopped-up layer across the field. "No matter how good the straw chopper on your combine, your yields will suffer if you don't deal with straw," he says. See story on page 2.

Slick Way To Cross Fence

Motoring around the farm is a lot quicker for Alberta farmer George Rothweiler who set up this "ladder ramp" to avoid having to open and close a gate. See story on page 2.
