Vol. 22, No. 2, 1998
\$4.50

Bill Wahouske's truck-mounted sprayer is equipped with tractor tires for improved flotation and traction. "It'll walk right through the biggest mud holes and never get stuck," he says. See page 2.

"No matter how big the truck or how it's positioned beneath my auger, I can always fill it completely full without having to move the truck," says Tim Lindhorst about his "side swing" auger unloading spout. It's controlled by a 12-volt electric winch. See page 2.

A pair of Florida farmers have come up with a way to mount a powered wheel on front of tractors to unroll round bales on the ground. The up-front wheel is powered by a hydraulic motor. "It rolls out hay like a red carpet," they say. See page 2.

First-Of-Its-Kind Combine Video

*"You won't believe
your eyes!"*
