

“Gull Wing” System For Dual Tires

Narrow roads can be a big problem throughout Europe so if a farmer needs duals, getting to remote fields is an issue. That prompted Peecon to come up with a “gull wing” system that detaches both rear duals and lifts them up over the tractor for transport.

When the machine arrives at a field, the operator can fold down the wheels without leaving the cab. Duals quickly attach to rear wheels with a special coupling system.

Take Us To Your Barber

We need your help! One of the most challenging aspects of publishing a magazine like FARM SHOW is getting the word out. Here’s an idea: When you’re done reading this copy of FARM SHOW, instead of tossing it out, why not leave it in a public place where others might find it? Your barbershop, doctor’s office, equipment dealership, favorite restaurant, or anywhere else you think people might enjoy it. If you don’t want to part with your copy, just send us the name and address of those local establishments (FARM SHOW, P.O. Box 1029, Lakeville, Minn. 55044 or email: circulation@farmshow.com) and we’ll send them a couple free issues.
