

## A Cleaner Planter Lubricant

A cleaner, safer and healthier new seed and mechanical lubricant made entirely from soybeans was introduced at the recent National Farm Machinery Show in Louisville, Ky.

DUST is a light-colored powdered lubricant that provides the needed lubricity for proper seed flow, but is much cleaner to use. Since it's made entirely from soy protein, it will disappear within 28 days from the furrow.

"It's a great seed box treatment for your planter or grain drill and is much cleaner to use than graphite or talc, which farmers have been using for years. It quickly rubs off your hands, face, and clothing," says Dave Burgei, S.I. Distributing, Spencerville, Ohio. "DUST is biodegradable and breaks down in the soil without leaving any residue in the environment."

DUST is a low use rate product. "Generally, the starting rate should be no greater than 1/4 cup per unit of seed. The rate will depend on the type of planter, seed type, planting conditions, and so forth."

DUST is sold in 7-lb. (\$57.50) and 14-lb. (\$98) containers.

## Glass-Mounted Gun Rack For Tractors, Combines

"Our new glass-mounted gun rack lets you carry any caliber of rifle or shotgun with you on your tractor or combine. It attaches to any glass area to hold the gun rock-solid," says Joe Mullinax, Gun Grabber Products, Inc., Texarkana, Ark.

The patented Gun Grabber 310VT Glass Mount has double suction cups that grip the glass. You set the gun's stock into a floor-mounted rubber "butt" and then press the gun barrel into a U-shaped rubber pocket on the glass-mounted holder. To remove the gun, twist down the front side of the Gun Grabber and pull the gun straight out toward you.

"It's easy to set up, simple to use, and can be easily moved to another tractor or combine," says Mullinax. "It's ideal for modern tractors and combines, which have so much glass there's nothing solid on which to mount a traditional gun rack."

"Once you insert the gun in the Gun Grabber, it won't come out. We have an 8-year contract with the federal government to supply the Gun Grabber to the U.S. Coast Guard, so we know it'll hold up to rough conditions. Also, it's made in the U.S."

The Gun Grabber 310VT Glass Mount sells for \$64.95 plus S&H.

The company also offers several kinds of

## Airbag Lifts Controlled By Bluetooth Phones

You can adjust airbag pressure on vehicles and trailers on-the-go using smartphone Bluetooth to fit the load you're carrying. If you have a top-heavy or uneven load you can quickly adjust the right or left side air bags to even things out, all using an app on your Android or iOS phone.

"Bluetooth control by your phone is very user friendly and there are built-in diagnostics," says Matt DeWitt, Air Lift Co. "We have 22 codes for real time troubleshooting for air leaks and loads that need to be adjusted."

Going wireless means eliminating air lines to the cab. The WirelessAir kit includes a heavy-duty air compressor, a wireless remote control, and a compact, dual-path, Bluetooth-enabled manifold. All wiring, hardware and fittings are also included in the \$499 kit.

Opt for the EZ Mount bracket system and cut the 3-hr. installation time in half. It comes with the manifold and compressor preassembled and factory-tested for even faster and easier installation.

If uneven or top-heavy loads are not a concern, WirelessOne at \$299 is a lower cost option. It comes with a standard-duty air compressor and a small manifold. It maintains equal left/right air pressure whether inflating or deflating is needed. It is also available in an EZ Mount configuration.

Both systems offer 3, user-defined, preset memory settings for frequently used pressures.

**Creveling built 4 separate wired pens onto the side of an old corn crib, converting it into a low-cost chicken coop.**

## Corn Crib Chicken Coop

"We turned an old corn crib into an excellent chicken coop," says Nick Creveling, Cedar Springs, Mich.

Four separate wired pens were built onto the side of the crib and the inside of the crib can be sectioned off as well to match the pens.

"The crib is ideal because it has openings for good ventilation and yet there's plenty of protection from bad weather. Both ends of the crib open up for easy cleanout. Small doors on the back side make for easy feeding without going inside. Nest boxes mount inside, facing the center aisle, so it's easy to retrieve eggs."

Contact: FARM SHOW Followup, Nick Creveling, 3331 Solon, Cedar Springs, Mich. 49319.

## Do Friends & Family Borrow Your Copy Of FARM SHOW?

You probably don't mind sharing your copies of FARM SHOW with friends, neighbors, relatives or co-workers, but wouldn't it be nice if they all had their own subscriptions? Now you can "gift" a year of FARM SHOW to anyone and renew your own subscription at a cut-rate price. See enclosed order form, go to [www.farmshow.com](http://www.farmshow.com), or call 800 834-9665 to order.

Thanks!
