

## Bore Under Roads - Drill Shallow Wells

BorZit lays pipe or wire under roads, driveways, barns or any improvement faster, with less effort, and saves time and money!

It eliminates the drudgery of digging and back-filling and the need to tear up concrete, asphalt or roads. You can also install well points, drill shallow water wells, bore through dams, or develop springs. The system also bores post holes, cleans drain lines, or opens culverts.

BorZit is powered by a 1/2-in. drill. A water hose is attached to the ball valve, providing water to lubricate the tool and moisten the soil ahead of the bore (not much water is needed.) Cuttings are compressed into the sides of the hole by the rotation of the bit.

The bit is attached to a length of 3/4-in. steel pipe. Add additional lengths of pipe until the bore is completed. Remove the bit and attach pipe that is to be left in the hole and pull the drill pipe back out. The system can bore a 1-1/4-in., 2-in., 3-in., 5-in. or 7-in. hole.

BorZit is proudly 100% made in the U.S.A. – and backed by a full 1-yr. guarantee. The basic system sells for \$239 and includes a 2” bit and carry case.

Contact: FARM SHOW Followup, BorZit Systems, 218 E. 3rd Street, Kimball, Neb. 69145. For a free brochure, call 800-803-8738 or e-mail [info@borzit.com](mailto:info@borzit.com). Order online at [www.borzit.com](http://www.borzit.com).

## Geno's Garage Specializes In Ram Turbo Diesel Truck Parts And Accessories

### 25 Years and Counting: the Geno's Garage Story

We started our niche parts business for Dodge/Cummins Turbo Diesel pickup owners in May of 1996. Long story, short version: We wanted a combination Boost and EGT gauge. However, there was a 25 unit minimum order to get the "Combo Gauge." So, we ordered the 25 gauges, holding out one and thinking we could sell the other 24 units to Turbo Diesel Register members. At the time this was a leap-of-faith. We sold the other 24 gauges.

Just like those early days with the combo gauge, we continue to innovate and bring you Dodge (Ram) Cummins specific parts.

Remember, Dodge (Ram) Cummins specific parts are all we do. If you have questions about what to buy or how to install it, unlike so many of the internet-

related business, we actually answer the telephone. (Scary, eh?). You will also find technical information and videos along with helpful installation instructions on our website.

Our website and 80-page catalog covers parts for 1989-2020 trucks including filters, engine parts, replacement parts, interior parts and accessories, drivetrain, fuel system, specialty tools and more.

Our goal is simply to provide Ram Turbo Diesel truck owners with great customer service and high quality, fairly priced products. We want you to think of us as the place you can go for infor-

mation without "hype" or high-pressure sales pitches. Give us a call or shop us online.
