

STX Idler

MT Idler

John Deere Idler

Camso Cap KCP3777

“Kile® Clear View® Caps” are designed for rubber track tractors. See the level & clarity of the oil in idlers and rollers.

Kile® Clear View® Caps For Rubber Track Tractors

The patented Kile® Clear View® Caps for rubber track systems are used in farming and construction, replacing steel caps. Operators can easily see the level and clarity of the oil in their idlers and rollers making it simpler to ensure that proper oil levels are maintained.

This injection-molded product is made from scratch-resistant, UV-protected polymer that withstands extreme temperatures and high impact. Kile® Clear

View® Caps are made in the USA and come with a 5-year pro-rated warranty. Kits or individual caps, come with the necessary hardware for installation and instructions.

Kile® Clear View® Cap Kits are available for Case IH STX/ 9300 Series Quad Trac, AGCO MT 700/800, Cat 35/95, Lexion/ Claas Track Combines, John Deere 8000 & 9000 T, RT & RX Series, Camso and Griptrac Systems.

Owner/operators are invited to visit Kile

Mfg.’s website for information and prices for the kits, individual caps, product update, and new products. A continually updated dealers list can be viewed on the website. Brochures and more information can be obtained upon request.

Do Friends & Neighbors Borrow Your FARM SHOW?

You probably don’t mind sharing your copies of FARM SHOW with friends, neighbors, relatives or co-workers, but wouldn’t it be nice if they all had their own subscriptions? Now you can “gift” a year of FARM SHOW to anyone and renew your own subscription at a cut-rate price. See enclosed order form or go to www.farmshow.com to order.

T-Post “Staple” Allows Side-To-Side Movement

This new T-post fence clip, called the Steel Post Staple, holds a strand of barbed wire to the face of the T-post, but still allows side-to-side movement of the wire and the barbs. It is made in the USA from high-tensile galvanized wire and forms a loop in the middle. “We have always had to remove the clips from the T-posts to stretch or repair the fence. With the Steel Post Staple, that step is eliminated,” says Richard Hendricks, Box T Brand LLC, Atkinson, Neb.

When repairing or replacing livestock fencing, people have steered away from T-posts because the traditional clips have to be removed in order to repair or adjust the fence. These clips make using T-posts an option in more fencing locations, by saving time and reducing labor.

The clips are available online at: steelpoststaples.com (the only place online to order the 1000 count buckets), Amazon.com (search: Steel Post Staples) and Runnings.com. They are also available at CAL Ranch Stores and Runnings stores as well as more than a hundred local Co-Op’s and Farm & Ranch supply stores. Some stores have them with the OK Brand label.

Though no special equipment is needed to install the clips, Box T Brand has an installation tool available.

T-post “staple” is made from high-tensile galvanized wire and forms a loop in the middle. You clip the staple onto one side of post and then use a pliers to bend it around back side of post.

The Steel Post Staple is available for immediate delivery, in 100 and 1000-count packages, as well as pallet loads. Pricing is posted at the company’s website, along with the dealership map, photos, videos, and installation instructions. Contact the company to inquire about dealerships.
