WEEDER**  
CORDLESS, LIGHTWEIGHT TILLER

## Gophers, Prairie Dogs, And Moles - Gone For Good!

"Our patented, cart-mounted Rascal Eradicator uses carbon monoxide to kill gophers, prairie dogs and moles quickly and safely. It's easy to use and works fast," says Underground Pest Control System's Bill Anderson.

The 4-wheeled machine has two 25-ft. hoses and an easy-start Briggs & Stratton 4-cycle gas engine. Put one hose into an open burrow, cover with dirt, and do it again with second hose. The carbon monoxide quietly puts the animal to sleep. Once over is all it takes.

"It doesn't use poisons that kill other animals and pets, and it doesn't

cause explosions that can disturb large areas of land," says Anderson.

The cart makes it easy to move from hole to hole, and with both hoses you can easily cover a 50-ft. radius. (100 ft radius hose optional). The machine has been field-tested for more than 2 years and is built to last. It costs about a DIME a burrow for fuel. Use It In any weather and any day of the year.

The Rascal Eradicator sells for \$2,600 plus S&H. Ask about current specials!

Contact: FARM SHOW Followup, Bill Anderson, P.O. Box 164, Suite 100, 992 South Fourth St., Brighton, Colo. 80621 (ph 303 910-9106; [info@rascalradicator.com](mailto:info@rascalradicator.com); [www.rascalradicator.com](http://www.rascalradicator.com)). call, text or email any time.

"It's a simple, safe way to kill gophers, prairie dogs and moles and works fast," says Bill Anderson.

## Add-On Power Steering Kits

"We are in our twenty-first year of building custom power steering for tractors, implements and off road vehicles," says Roland Jackson, president of Jackson Power steering. Specifically Jackson specializes in the following tractors:

- Ford 8N, Jubilee/NAA, 600 Series, 800 Series, 1000 Series and the Ford Industrial tractors
- International Harvester 300, 330 and 350 Utility
- Oliver Super 55 and 550 tractors
- John Deere 650, 750, 850, 950 and 1050 compact tractors.
- All Kubotas and Yanmar tractors

Jackson Power Steering offers two types of power steering. One is the Torque Generator. The other is Hydrostatic Power Steering.

The steering unit is built so anyone can install it using standard tools. Excellent instructions with lots of pictures are provided. In addition, factory help is as close as the phone if the customer has questions. There is much more information, regarding the steering unit, at the Jackson website: [www.jacksonpowersteering.com](http://www.jacksonpowersteering.com). Included are customer testimonials, pictures, videos, and a section of questions and answers about the steering unit.

Contact: FARM SHOW Follow-up, Jackson Power Steering, 17321 NW V Road, Jetmore, Kansas 67854 (ph 620-357-6546; email: [sales@jacksonpowersteering.com](mailto:sales@jacksonpowersteering.com)). **Reader Inquiry No. 60**

This JPS Power Steering Kit would fit on a Ford tractor. Steering units for other models will differ as far as the components.

Redesigned chain guard is short enough to avoid dragging or hitting mower blades.

## Upgraded "Chain Guard"

"I've made a design change to my 'chain guard' that replaces the mower discharge chute on my riding mower (Vol. 42, No. 2). This is my third design, and I find it much simpler and easier to put together," says Al Robbins, Friendswood, Texas.

"I came up with the idea because I got tired of the grass discharge chute on my Deere ZTrak zero-turn riding mower getting in the way all the time. I replaced it with a 'chain guard' that results in easier trimming and parking in tight areas," he says. "I started selling chain guards and now have 100 happy customers from all over the U.S. and Canada.

"I'm making and selling these for \$6 per inch of guard, plus S&H. So a 12-in. guard would be \$72 and a 16-in. guard \$96," says Robbins.
