

To make the "perfect omelette", you first divide the omelette mixture between the two pans, then top with filling, if desired, and cook for 2.5 min. Then flip and cook for another 1.5 min. and serve.

TAKES ONLY 4 MINUTES

"Eggory" Makes Perfect Omelette

Now, thanks to the new Eggory, introduced by Mirro Aluminum Co., you can make "the perfect omelette" in just 4 min. What's more, you can use it to cook other egg dishes, or to grill sandwiches, crepes, french toast, bacon, upside-down cake and other desserts.

The Eggory features twin 5 x 5 in. removable pans made of heavy gauge, even-heating aluminum with non-stick Teflon II interior cooking surfaces. Hinged pans make flipping the contents from one pan to the other spill-free. One pan flips over the hinge to serve as

a cover for the other and forms a mini-bake oven.

The portable unit operates on 120 volts with a thermostatically controlled 1000-watt element. Comes with a recipe book that ranges from "easy over eggs" to gourmet crepe recipes.

Suggested retail price is \$29.95.

For more details, contact: FARM SHOW Followup, Mirro Aluminum Co., Box 409, Manitowoc, Wis. 54220 (ph 414-684-4421).

AUTOMATIC PRESS-BUTTON PROGRAMING

"Touch Command" Timer For Lamps, Appliances

Now, with just a push of a button, you can set the new "Touch Command" timer from Paragon Electric to automatically turn lamps and appliances on or off at whatever time you desire.

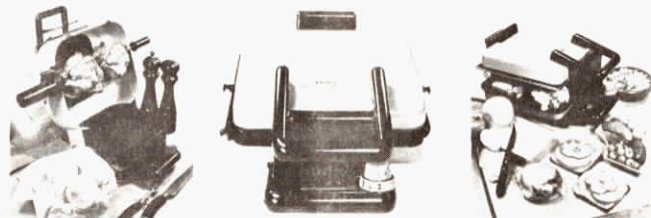

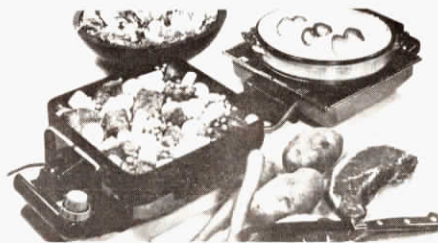

The timer features push button settings for up to 12 on-off operations daily, and has a manual by-pass switch. The model PPW10 is rated at 1.875 watts/15 amps. It plugs directly into a wall receptical and eliminates cord clutter.

If you're away on a trip for example, the Touch Command programmer can be set to automatically turn a hall light on at night, and turn it off

the next morning, and repeat the cycle every 24 hours. It can also be used for dozens of other uses, such as turning on the coffee pot so coffee is brewed and ready when you wake up in the morning, or to automatically turn off TV after you've set it for whatever viewing time you want. It can also be used to automatically turn off radios, vaporizers, fans or whatever.

Suggested retail \$11.95.

For more details, contact: FARM SHOW Followup, Paragon Electric Co., 606 Parkway Boulevard, Two Rivers, Wis. 54241 (ph 414-793-1161).

BOILS, BAKES, BROILS, FRIES, STEWS, ROASTS, BARBECUES

New All-In-One Cooking System

Hottest new cooking item introduced at the 1978 National Housewares Expo in Chicago is the new "all-in-one" cooking system from Krups. It does everything — grills, roasts, stews, bakes, boils, fries and barbecues.

The portable unit measures 12 x 12 in. and weighs 16 lbs. It features Ceran glass technology for infra-red cooking. The basic unit has a double switch, a ceramic hotplate; two grill plates and a casserole. Op-

tional extras include waffle irons, rotary grill with spit for grilling chickens, roasts or shish kabobs. Can be used indoors or outdoors.

Suggested retail cost of the basic unit is \$220. Cost of the options includes \$50 for the rotary grill and \$30 for the waffle irons.
