UNHAPPY OWNERS SUING FOR NEGLIGENCE AND FRAUD

Superiority Of Harvestore Silos Challenged

By Harold M. Johnson,
Editorial Director

ATTENTION A. O. SMITH HARVESTORE OWNERS!

Recent studies suggest that significant feed damage and spoiling of feed may occur in Harvestore silo structures, causing lower milk production. If you have spoiled feed you may have a valid claim for damages. For a professional and experienced analysis of your claim at no charge or obligation, please call.

The above advertisement, published last Feb. 14 in the Rochester (Minn.) Post-Bulletin by the law firm of Steward, Perry, Mahler and Bird, of Rochester, produced several dozen calls and letters from disgruntled Harvestore owners in southeastern Minnesota, Iowa and Wisconsin, according to Will Mahler.

In Willmar, Minn., the law firm of Schneider, Beccue & Kallestad is representing "more than 40" unhappy Harvestore owners who are taking

(Continued on next page)

Photo at top shows Harvestores in process of being converted to conventional top unloading. Note doors in silo at right and chute already installed over doors on center structure. Bottom photo shows workmen cutting holes for doors (see story p. 4).
